

JEROME LORA

Full Stack Developer

Rodriguez, Rizal, PH | 09063358329 | Jerome.lora21@gmail.com | github.com/jerome200024 | jerome-lora.vercel.app | linkedin.com/in/jerome-lora

PROFESSIONAL SUMMARY

Junior Full Stack Developer with hands-on experience designing, building, and deploying web applications using React.js, Next.js, Node.js, and PostgreSQL. Skilled in building responsive frontend interfaces, developing RESTful APIs, managing relational databases, and integrating third-party services. Proficient in Git version control, cloud deployment (Vercel, Railway), and agile development workflows.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, JavaScript, TypeScript, Flutter, Dart

Backend: Node.js, Express.js, FastAPI, Python, RESTful APIs,

Database: PostgreSQL, Firebase, SQLite

Tools & Platforms: Git, GitHub, Vercel, Render, VS Code, Postman

PROJECTS

Clinic Management System

- Built a full-stack clinic management platform supporting appointment booking, scheduling, tracking, and patient record management.
- Developed responsive UI components with React.js and Tailwind CSS; implemented backend logic via Node.js and Express.js REST APIs.
- Designed and integrated a PostgreSQL relational database with JWT-based authentication and role-based access control (RBAC) for secured administrative routes.

Personal Portfolio Website

- Designed and developed a fully responsive personal portfolio using React.js and Tailwind CSS, showcasing projects, skills, and professional background.
- Deployed on Vercel with continuous deployment via GitHub, enabling streamlined version control and automated updates.
- Implemented smooth navigation, modern UI components, and layout optimized for both mobile and desktop devices.

Mini Garden Automation System (Capstone Project)

- Built an IoT-based smart garden automation system that triggers plant watering automatically based on real-time soil moisture sensor data.
- Developed a cross-platform Android application using Flutter and Dart for live system monitoring and manual irrigation control.
- Collaborated on integrating hardware sensors and automation components, enabling real-time data feedback and system responsiveness.

INTERNSHIP EXPERIENCE

PC Canlas Builders Corporation

Sep - Nov 2025

IT Intern

- Provided technical support to 20+ employees, resolving hardware, software, and peripheral issues to minimize downtime and maintain productivity.
- Assisted the MIS team with server monitoring, system maintenance, and day-to-day IT operations.
- Performed LAN cable installation and basic network troubleshooting to support stable office network infrastructure.

EDUCATION

Bachelor of Science in Information Technology

Sep 2022 - Dec 2025
